Dear Sarah:

It's that time of year again! Would you be able to give a research info session to my MUSI 4334 class? They have an 8-10 page research paper due near the end of the semester. The class meets from 11:00-11:50am MWF. Would Wed., September 6 work for you?

Many of these students are the same ones that you talked to last spring in MUSI 1307. I still find that students do not use the Groves or the electronic databases as much as they could, though. They just seem to give up too easily after a single search fails. They also tend to wait too long so that ILL is out of the question.

Just let me know!

Thanks very much,

Diana
