Training Program

Practicum Counselor Training Program

The TAMUCC University Counseling Center offers semester long placements, 12 hours per week for master’s level graduate students training to become counselors. This practicum training experience provides an excellent opportunity for the developing counselor to gain clinical experience within a University Counseling Center setting. We offer opportunities to gain experience in personal skills counseling, individual counseling, group counseling, intake assessment, and outreach activities. Opportunities are also available to pursue special interests in a particular clinical area (e.g., substance abuse, assessment, and stress management).

Program Description

The goal of the practicum program is to prepare counselors to practice independently in fulfilling the multiple roles required of a university counselor. This is facilitated by developing the practicum students’ basic helper skills in addition to skills related to his/her duties assigned as determined by the student, supervisor, and service needs of our clients. As guided by the mission of the University Counseling Center and TAMUCC we strive to provide an atmosphere that is professionally supportive and growth-oriented to assist the practicum student in reaching his/her personal, academic, and professional
