Educational Center for Mathematics and Sciences

The Educational Center for Mathematics and Science (ECMS) at Texas A&M University-Corpus Christi is dedicated to providing a solid base in science and math today for the workforce of tomorrow. As part of the university's College of Education, the center hosts courses for teachers in training, field trips for area students, summer camps, and night and weekend professional development classes for experienced educators.

Equipped with a wet lab, a discovery lab, exhibit space, and state-of-the-art computer technology, the center provides hands-on learning, allowing students to grasp concepts through experience rather than lectures or drills.

The ECMS is located next to the Early Childhood Development Center on the TAMUCC campus.
